

MetaSense DYNO

GPIO Mappings Report

Overview

This report lists the currently allocated GPIOs in the active firmware, plus the attic CAN mapping that is kept free for future use in the active firmware.

Notes

- No conflicts were found in the active firmware.
- CAN TX/RX are currently free in the active firmware.
- Pot3 / Kp has been remapped to GPIO 6.

Generated for the current project state.

GPIO Table

GPIO | Signal | Notes

1 | RPM setpoint pot | ADC1_CH0
2 | Throttle pot | ADC1_CH1
3 | Tachogen RPM | ADC1_CH2
4 | CAN TX | attic mapping, free in active firmware
5 | CAN RX | attic mapping, free in active firmware
6 | Kp pot (pot3) | ADC1_CH5
17 | I2C SDA | shared bus
18 | I2C SCL | shared bus
32 | Load cell ADC fallback | analog input
35 | Panel SW switch | active LOW
36 | VCU / RB+ ready | active LOW
38 | RB- FET | output
39 | SSSR | output
40 | Brake PWM | LEDC channel 1
41 | Throttle VCU PWM | LEDC channel 2
45 | Engine throttle PWM | LEDC channel 0
48 | Onboard LED | RGB LED
